

RESUMEN

Las adquisiciones actualmente han cambiado su forma según los cambios que exige el mundo moderno, es importante indicar que en el actualidad las adquisiciones se realizan en línea tanto a nivel nacional como a nivel mundial existiendo una mayor cantidad de ofertas de artículos en el mercado dando una mayores opciones a los compradores, sin embargo en lo que se refiere a los abastecimientos que adquiere el Ejército relacionados con intendencia, material de guerra y transportes requieren de bienes y servicios no solo del mercado interno sino además de mercados y convenios internacionales para adquirirlos.

Para el desarrollo de este estudio se tomó como referencia al Comando Logístico Terrestre (CLT), la cual participa en las actividades de adquisiciones en el ámbito logístico para la adquisición de bienes y servicios.

Al desarrollar este estudio se establece una propuesta relacionada con un modelo de proceso de adquisiciones de bienes y servicios, a través del Programa de Asistencia y Seguridad del gobierno de EE.UU con recursos del presupuesto nacional y recursos provenientes del programa de cooperación con el gobierno de Estados Unidos de América, en apoyo a las unidades logísticas.

Donde se establece las actividades, tareas y diagramas de flujo relacionados, además de indicadores que permitirán medir la eficacia de este proceso, de tal forma de que estas adquisiciones sean más efectivas obteniendo bienes y servicios a precios bajos, a tiempo y de calidad.

ABSTRACT

Acquisitions have currently changed their form according to the changes demanded by the modern world, it is important to note that currently acquisitions are made online both nationally and worldwide there is a greater number of offers of items in the market giving greater options to buyers, however with regard to the supplies acquired by the Army related to intendency, War material and transport require goods and services not only from the domestic market but also from international markets and agreements to acquire them.

Acquisitions have currently changed their form according to the changes demanded by the modern world, it is important to note that currently acquisitions are made online both nationally and globally there is a greater number of offers of items in the market giving greater options to buyers, however with regard to the supplies acquired by the Army related to intendency, War material and transport require goods and services not only from the domestic market but also from international markets and agreements to acquire them.

For the development of this study, reference was made to the Land Logistics Command (CLT), which participates in procurement activities in the logistics field for the acquisition of goods and services.

In developing this study, a proposal is established related to a model of the procurement process of goods and services, through the Assistance and Security Program of the U.S. government. U.S. with resources from the national budget and resources from the cooperation program with the government of the United States of America, in support of logistics units. Where the activities, tasks and related flowcharts are established, as well as indicators that will allow measuring the effectiveness of this process, so that these acquisitions are more effective obtaining goods and services at low prices, on time and quality.
